EOC Daily Emergency Management Report

Date: 4/3/2013
Time: 10:30 AM EDT
Report No: 091

Alerts & Warnings

FEMA National Watch Center at a Watch/Steady State level
National Terrorism Advisory System (NTAS) – No Current Alerts
Continuity of Operations (COOP) COGCON Level is 4
EPA HQ at Level 6 (Steady State)
EPA R6 REOC at Level 3 (extended response/single incident) for Mayflower, AR Oil Spill

EPA Headquarters Activities

ASPECT (Airborne Spectral Photometric Environmental Collection Technology) is fully operational and on location in McKinney, TX for the period of April 1, 2013 through April 7, 2013.

Portable High Throughput Integrated Laboratory Identification Systems (PHILIS) labs and assets (located in Edison, NJ and Castle Rock, CO) are operational and available for deployment.

Significant National Weather

Heavy rain and thunderstorms currently moving across southeast Texas and Louisiana are forecast to shift eastward along the central Gulf Coast to the Florida Panhandle. Flash Flooding is possible along the Gulf Coast. A cold front with scattered rain and snow will move into the Northern Plains and the Great Lakes region. Cold conditions continue for the Upper Midwest.

Severe Thunderstorms: There are no areas of organized severe thunderstorm activity forecast for today.

Tropical Activity: There is no tropical activity threatening U.S. territories.

Tornado Weather: There is a 2 percent chance of tornado activity today for portions of Louisiana, Mississippi, Alabama and the Florida panhandle.

Significant Flood Outlook: There is significant river flooding occurring across portions of eastern Georgia and these conditions are expected to persist through April 7.

Critical Fire Weather: There is no critical fire weather forecast for today. Two large fires are being monitored on National Park Service land in Florida and Bureau of Land Management lands in Arizona.

Report of Incident Notifications

Grand River Oil Spill, Lansing, MI – On April 1, 2013 Lansing Board of Water and Light (BWL) reported a release of 300-500 gallons of hydraulic oil into the Grand River from a cracked seal on a hydraulic gauge. BWL responded by deploying boom at three locations (at the outfall and at two downstream locations) to contain and recover oil in the river. They also used vacuum trucks to remove oil remaining in the storm sewer and within the plant. On April 2, 2013, BWL hired a contractor to jet wash the sewer and install an additional collection point downstream of the outfall. An EPA Region 5 OSC responded to the Site, met with BWL and MDEQ personnel, and observed current respond efforts, providing additional technical assistance as needed. MDEQ is the lead for oversight of clean-up actions.

There were 22 epaosc.org websites created and/or updated during this reporting period (4/2/13– 4/3/13).

Exercises / Pre-Deployments

Nothing to report

Regional Daily Ops Status Report

Reported activities primarily represent NRC notifications with some state-level and other notifications to Regional Phone Duty Officers.

Reported Activities (4/2/13 – 4/3/13)

Region	Oil	Hazmat	Radiation	Other	Total
Region 1	0	0	0	0	0
Region 2	2	0	0	0	2
Region 3	3	0	0	0	3
Region 4	9	2	0	4	15
Region 5	5	1	0	2	8
Region 6	7	7	0	2	16
Region 7	2	2	0	0	4
Region 8	1	0	0	1	2
Region 9	12	3	1	8	24

Region 10	4	0	0	1	5
Total	45	15	1	18	79

Note: There were 1 unclassified events in the Hotline Log.
